

How to use the Avast MafiaWare666 ransomware decryption tool to decrypt files encrypted by the ransomware

Follow these steps to decrypt your files:

1) Download the free decryptor

2) Run the executable file. It starts as a wizard, leading you through the configuration of the decryption process.

3) On the initial page, you can read the license information if you want, but you really only need to click "Next"

8) On the final page, you can opt-in to backup your encrypted files. These backups may help if anything goes wrong during the decryption process. This option is on by default, which we recommend. After clicking "Decrypt" the decryption process begins. Let the decryptor work and wait until it finishes decrypting all of your files.
