

DeriaLock – How to Decrypt

Cautions:

1. Before initiating the decryption process we recommend to backup your hard-disk.
2. Make sure you are familiar with the specific procedure for how to reach to your safe mode during rebooting. **NOTE: if you fail to get into safe mode ALL YOUR FILES WILL BE DELETED.**
3. Check Point does not take responsibility on unsuccessful attempts to decrypt files using this tool.

User manual:

1. Restart the computer into safe-mode.
2. Go to C:\users\%user name%\appdata\roaming\microsoft\windows\start menu\programs\startup\
Look for either LOGON.exe or SystemLock.exe and delete them.
(the 'Date Modified' of them would be the infection date)
3. Restart the computer again
4. Download and execute the decryptor
5. Click the "I PAY GET MY FILES BACK NOW!" button.
